

Marmoset Serum

Cat. No.: NHP-BP008

This product is for research use only and is not intended for diagnostic use.

Marmoset monkeys are a kind of small monkeys that mainly inhabit South America. This serum product is collected from Marmoset monkeys' Veins or arteries tissue. The sample has been excluded from Herpes B Virus, retroviruses, SIV, SRV, and STLV infections. It can be used in a life science laboratory to carry out a lot of biochemical experiments including PCR, WB, immunoprecipitation, immunofluorescent flow cytometry, and Biomarker Discovery.

Detailed Product Description

Source	Healthy marmoset
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Serum is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through centrifugation processing of non-anticoagulated whole blood, serum does not contain fibrinogen or other clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
