

Cynomolgus Monkey Whole Blood

Cat. No.: NHP-BP019

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkey is usually used in scientific research, especially those involved in neuroscience and disease. The blood product is collected from the veins or arteries of Cynomolgus monkeys. The sample is high-quality and has been excluded from Herpes B Virus, retroviruses, SIV, SRV, and STLV infections. It can be utilized in a life science laboratory as a helpful tool to conduct a series of biochemical experiments, for example, PCR, WB, immunoprecipitation, immunofluorescent flow cytometry, and others.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Whole blood is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained into anticoagulant-treated tubes, whole blood does not contain clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
