

Rhesus Monkey Whole Blood

Cat. No.: NHP-BP020

This product is for research use only and is not intended for diagnostic use.

Rhesus monkey is often used in biological and medical research related to human and animal diseases even space travel because of its high closeness to humans. This blood product is collected from the veins or arteries of rhesus monkeys. The offered sample is high-quality and has been excluded from Herpes B Virus, retroviruses, SIV, SRV, and STLV infections. It can be utilized in a life science laboratory as a helpful tool to conduct a series of biochemical experiments, for example, PCR, WB, immunoprecipitation, immunofluorescent flow cytometry, and others.

Detailed Product Description

Source	Healthy rhesus monkey
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Whole blood is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained into anticoagulant-treated tubes, whole blood does not contain clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
