

Cynomolgus Monkey PBMCs

Cat. No.: NHP-PC001

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkey is mainly used in medical research especially those involved in neuroscience and disease. The cell product is separated from cynomolgus monkey blood. Cells are negative for bacteria yeast fungi mycoplasma and offer a tool for lots of tests and assays, for example, cell-cell interaction, adhesion, migration, PCR, WB, immunoprecipitation, immunofluorescent staining, immunofluorescent flow cytometry, or generating cell derivatives for desired research applications.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	≥ 85%
Applications	Suitable for a wide range of safety assessment and functional assays.
Organ/Tissue	Blood

Technical Specifications

Cell Type	Mononuclear cells
Species	Cynomolgus monkey
Cryopreservation	Cryopreserved with appropriate cryoprotectant.
Quality Control	Rigorously control cell purity and viability.
Cell Status	Cryopreserved

Shipping and storage

Shipping	Cryopreserved cells are shipped with dry ice overnight. Upon receipt, promptly transfer the frozen cells to liquid nitrogen for storage until they are ready for use. It is important to note that cells should never be stored in -20 °C or -80 °C freezer.
Storage	Liquid Nitrogen (-180 °C)
