

Cynomolgus Monkey Primary Bladder Epithelial Cells

Cat. No.: NHP-PC071

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkeys are often seen in medical experiments involved in neuroscience and disease. This product is isolated from bladder tissue. Cells have passed rigorous tests for bacteria, yeast, fungi, and mycoplasma, and can be used as a tool for many experiments such as cell-cell interaction, adhesion, PCR, Western blot, immunoprecipitation, immunofluorescent staining, immunofluorescent flow cytometry, or generating cell derivatives for specified research purposes.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	≥ 85%
Applications	Suitable for a wide range of safety assessment and functional assays.
Organ/Tissue	Bladder

Technical Specifications

Cell Type	Epithelial cells
Species	Cynomolgus monkey
Cryopreservation	Cryopreserved with appropriate cryoprotectant.
Quality Control	Rigorously control cell purity and viability.
Cell Status	Cryopreserved

Shipping and storage

Shipping	Cryopreserved cells are shipped with dry ice overnight. Upon receipt, promptly transfer the frozen cells to liquid nitrogen for storage until they are ready for use. It is important to note that cells should never be stored in -20 °C or -80 °C freezer.
Storage	Liquid Nitrogen (-180 °C)
