

Cynomolgus Monkey Primary Proximal Tubular Epithelial Cells

Cat. No.: NHP-PC084

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkeys are often used in scientific research. This available product is separated from kidney tissue. Cells are negative for bacteria, yeast, fungi, and mycoplasma. And the kind of product can be used as a tool for many experiments such as cell-cell interaction, adhesion, PCR, WB, immunoprecipitation, immunofluorescent staining, immunofluorescent flow cytometry, or generating cell derivatives for specified research applications.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	≥ 85%
Applications	Suitable for a wide range of safety assessment and functional assays.
Organ/Tissue	Kidney

Technical Specifications

Cell Type	Epithelial cells
Species	Cynomolgus monkey
Cryopreservation	Cryopreserved with appropriate cryoprotectant.
Quality Control	Rigorously control cell purity and viability.
Cell Status	Cryopreserved

Shipping and storage

Shipping	Cryopreserved cells are shipped with dry ice overnight. Upon receipt, promptly transfer the frozen cells to liquid nitrogen for storage until they are ready for use. It is important to note that cells should never be stored in -20 °C or -80 °C freezer.
Storage	Liquid Nitrogen (-180 °C)
