

Rhesus Monkey Esophagus

Cat. No.: NHP-TI017

This product is for research use only and is not intended for diagnostic use.

yes Rhesus monkey is widely used in medical and biological research on human and animal related diseases even space travel due to its closeness to the human anatomically and physiologically. This product is isolated from Rhesus monkeys Esophagus Tissue. The sample is negative for Herpes-B Virus, as well as SRV, SIV, STLV-1, and can be used for a variety of tests and assays such as PCR, Western blot, immunoprecipitation, immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy rhesus monkey
Applications	Given their robust resemblances to humans across physiological, behavioral, immunological, and genetic aspects, non-human primates serve as crucial models in a broad range of biomedical research, especially in bridging translational research from small animal models to humans. Creative Biolabs offers both standard formats and personalized non-human primate tissue preparations, catering to diverse <i>in vitro</i> testing applications.
System	Urinary System
Organ/Tissue	Esophagus
Shipping	Dry ice

Technical Specifications

Preservation Methods	Snap frozen
Quality Assurance	Tissue blocks are prepared by histologists with years of experience to be sure of excellent morphology and high quality.
Packaging	Securely packaged to maintain the tissue quality during shipping.
