

## Cynomolgus Monkey Lymph Node

Cat. No.: NHP-TI108

**This product is for research use only and is not intended for diagnostic use.**

**yes** This tissue block from Creative Biolabs is isolated from Cynomolgus monkeys' lymph node. The sample has been verified as negative for multiple types of virus infections including Herpes-B Virus, SRV, SIV, and STLV-1, and can serve as a beneficial tool in a number of *in vitro* test and assay experiments such as PCR, WB, immunoprecipitation, immunofluorescent flow cytometry.

### Detailed Product Description

|                     |   |
|---------------------|---|
| <b>Source</b>       | Healthy cynomolgus monkey   |
| <b>Applications</b> | Given their robust resemblances to humans across physiological, behavioral, immunological, and genetic aspects, non-human primates serve as crucial models in a broad range of biomedical research, especially in bridging translational research from small animal models to humans. Creative Biolabs offers both standard formats and personalized non-human primate tissue preparations, catering to diverse <i>in vitro</i> testing applications. |
| <b>System</b>       | Lymphatic System  |
| <b>Organ/Tissue</b> | Lymph node  |
| <b>Shipping</b>     | Dry ice   |

### Technical Specifications

|                             |  |
|-----------------------------|--|
| <b>Preservation Methods</b> | Snap frozen  |
| <b>Quality Assurance</b>    | Tissue blocks are prepared by histologists with years of experience to be sure of excellent morphology and high quality. |
| <b>Packaging</b>            | Securely packaged to maintain the tissue quality during shipping.  |
