

Cynomolgus Monkey Cerebellum

Cat. No.: NHP-TI141

This product is for research use only and is not intended for diagnostic use.

yes Creative Biolabs provides the tissue block obtained from Cynomolgus monkeys' cerebellum. The sample has been confirmed as negative for multiple types of virus infections, such as Herpes-B Virus, SRV, SIV, and STLV-1, and can offer a tool to carry out several *in vitro* biochemical experiments, for instance, PCR, WB, immunoprecipitation, immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Applications	Given their robust resemblances to humans across physiological, behavioral, immunological, and genetic aspects, non-human primates serve as crucial models in a broad range of biomedical research, especially in bridging translational research from small animal models to humans. Creative Biolabs offers both standard formats and personalized non-human primate tissue preparations, catering to diverse <i>in vitro</i> testing applications.
System	Nervous System
Organ/Tissue	Cerebellum
Shipping	Dry ice

Technical Specifications

Preservation Methods	Snap frozen
Quality Assurance	Tissue blocks are prepared by histologists with years of experience to be sure of excellent morphology and high quality.
Packaging	Securely packaged to maintain the tissue quality during shipping.
