

## Rhesus Monkey Cerebellum

**Cat. No.: NHP-TI142**

**This product is for research use only and is not intended for diagnostic use.**

**yes** Creative Biolabs provides the tissue block obtained from Rhesus monkeys' cerebellum. The sample has been confirmed as negative for multiple types of virus infections, such as Herpes-B Virus, SRV, SIV, and STLV-1, and can offer a tool to carry out several *in vitro* biochemical experiments, for instance, PCR, WB, immunoprecipitation, immunofluorescent flow cytometry.

### Detailed Product Description

<b>Source</b>	Healthy rhesus monkey
<b>Applications</b>	Given their robust resemblances to humans across physiological, behavioral, immunological, and genetic aspects, non-human primates serve as crucial models in a broad range of biomedical research, especially in bridging translational research from small animal models to humans. Creative Biolabs offers both standard formats and personalized non-human primate tissue preparations, catering to diverse <i>in vitro</i> testing applications.
<b>System</b>	Nervous System
<b>Organ/Tissue</b>	Cerebellum
<b>Shipping</b>	Dry ice

### Technical Specifications

<b>Preservation Methods</b>	Snap frozen
<b>Quality Assurance</b>	Tissue blocks are prepared by histologists with years of experience to be sure of excellent morphology and high quality.
<b>Packaging</b>	Securely packaged to maintain the tissue quality during shipping.
