

African Green Monkey Endocrine (specify organ)

Cat. No.: NHP-TI147

This product is for research use only and is not intended for diagnostic use.

yes African Green Monkey has long been one of the most important non-human primate models for biomedical research which is close to Rhesus monkey. This product is isolated from African Green Monkeys Endocrine Tissue. The sample is negative for Herpes-B Virus, as well as SRV, SIV, STLV-1, and can be used for a variety of tests and assays such as PCR, Western blot, immunoprecipitation, immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy African green monkey
Applications	Given their robust resemblances to humans across physiological, behavioral, immunological, and genetic aspects, non-human primates serve as crucial models in a broad range of biomedical research, especially in bridging translational research from small animal models to humans. Creative Biolabs offers both standard formats and personalized non-human primate tissue preparations, catering to diverse <i>in vitro</i> testing applications.
System	Endocrine System
Organ/Tissue	Endocrine
Shipping	Dry ice

Technical Specifications

Preservation Methods	Snap frozen
Quality Assurance	Tissue blocks are prepared by histologists with years of experience to be sure of excellent morphology and high quality.
Packaging	Securely packaged to maintain the tissue quality during shipping.
