

***M. pneumoniae* Monoclonal Antibody (IgG1, 100 µg/mL)(VAnt-Wyb475)**

PRODUCT INFORMATION

Product Overview

Mycoplasma pneumoniae, Mouse Monoclonal Antibody (Clone: B753M), specific for *M. pneumoniae* 70 & 80 kDa bands, Isotype: IgG1, 100 µg/mL, > 90% pure.

SPECIFICATIONS

Target	<i>Mycoplasma Pneumoniae</i>
Type	Antibody
Applications	Used for ELISA, IFA and Western Blot.

INFORMATION

Introduction	<i>Mycoplasma pneumoniae</i> , a small bacterium in the class Mollicutes, causes the disease mycoplasma pneumonia, which is a form of atypical bacterial pneumonia related to cold agglutinin disease. Symptoms include tracheobronchitis, primary atypical pneumonia and upper respiratory tract disease. It is 816,394 bp in size and grows exclusively by parasitizing mammals. <i>M. pneumoniae</i> is very susceptible to loss of enzymatic function by gene mutations.
Alternative Names	<i>M. pneumoniae</i>
