

Clostridium Polyclonal Antibody (1.21 mg/mL)(VAnt-Wyb591)

PRODUCT INFORMATION

Product Overview

Clostridium botulinum, Rabbit Polyclonal Antibody, specific for *Clostridium botulinum* Type A Neurotoxin, 1.21 mg/mL.

SPECIFICATIONS

| Target | Clostridium |
|--------------|--|
| Туре | Antibody |
| Applications | Used for Dot Blot, ELISA and Western Blot. |

INFORMATION

Introduction

Clostridium is a genus of Gram-positive bacteria, which contains around 100 species including common free-living bacteria, as well as important pathogens. Clostridium endospores have a distinct bowling pin or bottle shape, distinguishing them from other bacterial endospores, which are usually ovoid in shape. Clostridium species inhabit soils and the intestinal tract of animals, including humans. In general, the treatment of clostridial infection is high-dose penicillin G, to which the organism has remained susceptible.

Alternative Names

C. botulinum
