

Mouse Anti-SARS-CoV-2 Spike Neutralizing Monoclonal antibody, clone NN54 (CABT-CS064)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Target SARS-CoV-2 Spike S1 Immunogen Recombinant SARS-CoV-2 Spike S1-mFc Protein Isotype IgG1 Source/Host Mouse Species Reactivity SARS-CoV-2 Clone NN54 Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.	Specificity	React with SARS-CoV-2 Spike RBD Protein. No cross-reactivity in ELISA with SARS-CoV, MERS-CoV, HCoV-HKU1, HCoV-NL63, HCoV-229E, HCoV-OC43 Spike S1 Protein.
Isotype IgG1 Source/Host Mouse Species Reactivity SARS-CoV-2 Clone NN54 Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Target	SARS-CoV-2 Spike S1
Source/Host Mouse Species Reactivity SARS-CoV-2 Clone NN54 Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Immunogen	Recombinant SARS-CoV-2 Spike S1-mFc Protein
Species Reactivity SARS-CoV-2 Clone NN54 Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Isotype	lgG1
Clone NN54 Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Source/Host	Mouse
Purification Protein A Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Species Reactivity	SARS-CoV-2
Conjugate unconjugated Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Clone	NN54
Applications ELISA, Neut Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Purification	Protein A
Format Liquid Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Conjugate	unconjugated
Size 100ug Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Applications	ELISA, Neut
Buffer PBS Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Format	Liquid
Preservative None Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Size	100ug
Storage This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Buffer	PBS
Antibody products are stable for twelve months from date of receipt when stored at -20°C to -	Preservative	None
	Storage	Antibody products are stable for twelve months from date of receipt when stored at -20°C to -

BACKGROUND

Introduction

The spike (S) glycoprotein of coronaviruses contains protrusions that will only bind to certain receptors on the host cell. Known receptors bind S1 are ACE2, angiotensin-converting enzyme 2; DPP4, dipeptidyl peptidase-4; APN, aminopeptidase N; CEACAM, carcinoembryonic antigen-

related cell adhesion molecule 1; Sia, sialic acid; O-ac Sia, O-acetylated sialic acid. The spike is essential for both host specificity and viral infectivity. The term 'peplomer' is typically used to refer to a grouping of heterologous proteins on the virus surface that function together. The spike (S) glycoprotein of coronaviruses is known to be essential in the binding of the virus to the host cell at the advent of the infection process.

Keywords

SARS-CoV-2; coronavirus; SARS-CoV-2 spike 1; SARS-CoV-2 spike protein; SARS-CoV-2 S1; SARS-CoV-2 RBD; SARS-CoV-2 spike RBD
