
Mouse Anti-Mouse MHC Class I (H-2Kk, H-2Dk) Monoclonal antibody, clone 16-1-2N (HB14) (CABT-L4484)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	The 16-1-2N monoclonal antibody is reported to react with the mouse H-2Kk and H-2Dk MHC class I alloantigens. MHC class I antigens are heterodimers consisting of one alpha chain (44 kDa) associated with β2 microglobulin (11.5 kDa). The antigen is expressed by all nucleated cells at varying levels. MHC Class I molecules present endogenously synthesized antigenic peptides to CD8 T cells.
