

Rabbit Anti-MAPT Polyclonal Antibody

CPB-663RH Rabbit(MAPT)

Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview	Rabbit Anti-MAPT Polyclonal Antibody
Antigen Description	Promotes microtubule assembly and stability, and might be involved in the establishment and maintenance of neuronal polarity. The C-terminus binds axonal microtubules while the N-terminus binds neural plasma membrane components, suggesting that tau functions as a linker protein between both. Axonal polarity is predetermined by tau localization (in the neuronal cell) in the domain of the cell body defined by three centrosomes.
specificity	The antibody detects endogenous level of Tau only when phosphorylated at serine 356.
Target	MAPT
Immunogen	Peptide sequence around phosphorylation site of serine 356(I-G-S(p)-L-D) derived from Human Tau.
Host	Rabbit
Species	Human
Cross Reactivity	Human; Mouse; Rat
conjugation	N/A
Applications	IFA, WB
