Rabbit Anti-SNCA Polyclonal Antibody

CPB-787RH Rabbit(SNCA)
Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview	Rabbit Anti-SNCA Polyclonal Antibody
Antigen Description	SNCA is a member of the synuclein family of structurally related proteins that are prominently expressed in the central nervous system, which also includes beta- and gamma-synuclein. Synucleins are abundantly expressed in the brain and SncA and Snc-Beta inhibit phospholipase D2 selectively. SncA peptides are a major component of amyloid plaques in the brains of patients with Alzheimer disease. SncA shares 95% sequence homology with rat SncA. Rat SncA is specifically expressed in brain and is associated with synaptosomal membranes in neurons.
specificity	The antibody detects endogenous level of SNCA only when phosphorylated at tyrosine 125.
Target	SNCA
Immunogen	Peptide sequence around phosphorylation site of tyrosine 125 (E-A-Y(p)-E-M) derived from Human SNCA.
Host	Rabbit
Species	Human
Cross Reactivity	Human
conjugation	N/A
Applications	IFA,WB
