

Rabbit Anti-ATF2 Polyclonal Antibody

CPB-944RH Rabbit(ATF2) Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview Rabbit Anti-ATF2 Polyclonal Antibody

ATF2 encodes a transcription factor that is a member of the leucine zipper family of DNA binding Antigen Description

proteins. This protein binds to the cAMP-responsive element (CRE), an octameric palindrome. The protein forms a homodimer or heterodimer with c-Jun and stimulates CRE-dependent transcription. The protein is also a histone acetyltransferase (HAT) that specifically acetylates histones H2B and H4 in vitro; thus it may represent a class of sequence-specific factors that activate transcription by direct effects on chromatin components. Additional transcript variants have been identified but their biological

validity has not been determined.

specificity The antibody detects endogenous level oftotal ATF2 protein.
