

Recombinant IBV (B/Wisconsin/01/2012) Hemagglutinin / HA1 Protein [His] (DAG- H10576)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	A DNA sequence encoding the Influenza B virus (B/Wisconsin/01/2012) hemagglutinin (Met1-Arg362), termed as HA1, was expressed with a polyhistidine tag at the C-terminus
Purity	> 95% as determined by SDS-PAGE
Conjugate	His
Applications	Immunoassays
Molecular Weight	39.1 kDa
Format	Lyophilized
Size	100 µg
Buffer	Lyophilized from sterile PBS, pH 7.4
Storage	Store at -20°C to -80°C
Ship	Wet ice

BACKGROUND

Introduction	The Influenza B virus is an enveloped member of the Orthomyxoviridae family. Influenza B, along with Influenza A, is responsible for the respiratory illness influenza (flu). Influenza B differs from influenza A in that influenza B only infects humans and seals, while influenza A infects a wide range of animals, including birds and pigs. This increased host range allows
---------------------	---

influenza A to mutate about 2-3 times faster than influenza B.

Keywords

Influenza B virus; IBV; IBV HA; IBV Hemagglutinin
