

Recombinant IAV H1N1 (A/Taiwan/4845/1999) Hemagglutinin [His] (DAG-H10653)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	A DNA sequence encoding the Influenza A virus (A/Taiwan/4845/1999 (H1N1)) hemagglutinin (Met1-Ser523), termed as HA, was expressed with a polyhistidine tag at the C-terminus
Purity	> 75% as determined by SDS-PAGE
Conjugate	His
Applications	Immunoassays
Molecular Weight	58.4 kDa
Format	Lyophilized
Size	100 µg
Buffer	Lyophilized from sterile 20 mM Tris, 50 mM NaCl, 5 % trehalose, 0.05 % chaps, 2 M urea, pH 8.0
Storage	Store at -20°C to -80°C
Ship	Wet ice

BACKGROUND

Introduction	Influenza A virus causes influenza in birds and some mammals, and is the only species of influenza virus A. Influenza virus A is a genus of the Orthomyxoviridae family of viruses. Strains of all subtypes of influenza A virus have been isolated from wild birds, although disease is uncommon. Some isolates of influenza A virus cause severe disease both in domestic poultry and, rarely, in humans. Occasionally, viruses are transmitted from wild aquatic birds to
---------------------	--

domestic poultry, and this may cause an outbreak or give rise to human influenza pandemics.

Keywords

Influenza A virus; IAV; IAV H1N1; HA
