

Native Pneumonia Virus of Mice (DAG-WT1148)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	N/A
Applications	ELISA
Format	Liquid
Size	1 mg
Buffer	50 mM Glycine, pH 9 with <0.2% CHAPS and 0.01% SDS
Preservative	None
Storage	Store at -80°C. Avoid multiple freeze/thaw cycles.
Ship	Dry ice

BACKGROUND

Introduction	Pneumonia Virus of Mice (PVM) is related to the human and bovine respiratory syncytial virus (RSV) pathogens, and has been used to study respiratory virus replication and the ensuing inflammatory response as a component of a natural host—pathogen relationship.
Keywords	Pneumonia Virus of Mice; PVM
