

Recombinant Feline Serum Amyloid A (DAG-WT1205)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|--------------|---------------------------------|
| Purity | > 90% as determined by SDS-PAGE |
| Conjugate | His |
| Applications | Immunoassays |
| Format | Liquid |
| Size | 100 µg |
| Buffer | Tris/PBS-based buffer |
| Preservative | None |
| Storage | Store at -20°C |

BACKGROUND

| | |
|--------------|--|
| Introduction | Serum amyloid A (SAA) proteins are a family of apolipoproteins associated with high-density lipoprotein (HDL) in plasma. Different isoforms of SAA are expressed constitutively (constitutive SAAs) at different levels or in response to inflammatory stimuli (acute phase SAAs). These proteins are produced predominantly by the liver. The conservation of these proteins throughout invertebrates and vertebrates suggests that SAAs play a highly essential role in all animals. |
