

Recombinant peste des petits ruminants virus N protein (DAG-WT1342)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Purity	> 90% as determined by SDS-PAGE
Conjugate	His
Applications	ELISA, LFIA
Stability	12 months
Format	Liquid
Size	1 mg
Buffer	50mM Tris, 8M urea, pH 7.3
Preservative	None
Storage	Store at 2-8°C

BACKGROUND

Introduction Peste des petits ruminants is an internationally notifiable disease of small domestic and wild ruminants. It is caused by a Morbillivirus closely related to but distinct from rinderpest virus. The main organ systems affected are the respiratory and digestive systems. Treatment is restricted to supportive care; a vaccine is available for prevention.

Keywords Peste des petits ruminants virus; PPRV; Goat plague
