

## Diuron [OVA] (DAG-WT1789O)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

|              |                |
|--------------|----------------|
| Conjugate    | OVA            |
| Applications | ELISA, LFIA    |
| Format       | Liquid         |
| Size         | 1 mg           |
| Buffer       | PBS            |
| Preservative | None           |
| Storage      | Store at -20°C |
| Ship         | Wet ice        |

### BACKGROUND

|              |                                                                                                                                                                                                                                                                                             |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Introduction | Diuron is a white crystalline solid. It is a wettable powder. The primary hazard is the threat to the environment. Immediate steps should be taken to limit its spread to the environment. It can cause illness by inhalation, skin absorption and/or ingestion. It is used as a herbicide. |
| Keywords     | Diuron; DCMU; (3-(3,4-dichlorophenyl)-1,1-dimethylurea); Herbicide                                                                                                                                                                                                                          |
