

Diclofop-methyl [BSA] (DAG-WT1866B)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	BSA
Applications	ELISA, LFIA,
Format	Liquid
Size	1 mg
Buffer	10mM PBS, pH 7.4
Preservative	None
Storage	Store at -20°C
Ship	Wet ice

BACKGROUND

Introduction	Diclofop methyl is a herbicide that is widely used to control weeds in agriculture and landscaping. It belongs to the class of chemicals known as selective herbicides, which target specific plants while leaving others unharmed. Diclofop methyl works by inhibiting the growth of weeds, but it is generally considered to be safe for the environment and human health when used as directed. It is important to follow the instructions provided on the product label and to use diclofop methyl in a responsible and responsible manner.
Keywords	Diclofop methyl; 51338-27-3; Illoxan; Dichlorfop-methyl
