

Phalloidin [BSA] (DAG-WT1895B)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Conjugate	BSA
Applications	ELISA, LFIA,
Format	Liquid
Size	1 mg
Buffer	10mM PBS, pH 7.4
Preservative	None
Storage	Store at -20°C
Ship	Wet ice

BACKGROUND

Introduction	Phalloidin, which is a bicyclic toxin from the Amanita phalloides mushroom, has been shown to inhibit F-actin degradation by proteolytic enzymes including trypsin and α -chymotrypsin.
Keywords	Phalloidin; Amanita phalloides
