

## Butafosfan [BSA] (DAG-WT1907B)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

Conjugate	BSA
Applications	ELISA, LFIA,
Format	Liquid
Size	1 mg
Buffer	10mM PBS, pH 7.4
Preservative	None
Storage	Store at -20°C
Ship	Wet ice

### BACKGROUND

Introduction	Butafosfan is an herbicide commonly used for agricultural purposes. It belongs to the fenoxycarbons family and is widely used to control bacterial and fungal diseases in crops, as well as to manage weeds in cotton and soybean fields. However, its use has been associated with potential environmental and health risks, such as environmental pollution and neurotoxicity. It is important to follow proper usage guidelines and safety protocols when handling and applying butafosfan to minimize potential risks.
Keywords	Butafosfan; Herbicide
