

Recombinant *P. vivax* MSP-1 [His] (DAGA-221)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	<i>P. vivax</i> MSP-1 Recombinant Plasmodium vivax Merozoite Surface Protein 1 (MSP-1), (Malaria) Recombinant Contains a 6 His tag. Molecular weight is 20 kDa
Antigen Description	Plasmodium vivax is a protozoal parasite and a human pathogen. The most frequent and widely distributed cause of recurring (Benign tertian) malaria, <i>P. vivax</i> is one of the five species of malaria parasites that commonly infect humans. It is less virulent than Plasmodium falciparum, the deadliest of the five, but vivax malaria can lead to severe disease and death due to splenomegaly (a pathologically enlarged spleen). <i>P. vivax</i> is carried by the female Anopheles mosquito, since it is only the female of the species that bite.
Purity	≥ 95% pure (SDS-PAGE). Metal Affinity Chromatography
Conjugate	His
Applications	ELISA, WB
Molecular Weight	20 kDa
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	1 mg
Buffer	10 mM Sodium Carbonate, pH 9.0
Preservative	0.1% Sodium Azide
Storage	Store at 2-8°C for up to 1 month. Store long term at -70°C. Aliquot to avoid multiple freeze/thaw cycles.
