

## Ormetoprim [HRP] (DAGB303)

This product is for research use only and is not intended for diagnostic use.

### PRODUCT INFORMATION

|                     |                                                                                                                                     |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Specificity</b>  | Each conjugate comprises antigen covalently bound to horseradish peroxidase and is suitable as a tracer in immunoassay development. |
| <b>Species</b>      | N/A                                                                                                                                 |
| <b>Conjugate</b>    | HRP                                                                                                                                 |
| <b>Applications</b> | IA                                                                                                                                  |
| <b>Format</b>       | The conjugate is supplied as a concentrate. Dilute as required and use working strength conjugate immediately after dilution        |
| <b>Size</b>         | 0.5 ml                                                                                                                              |
| <b>Preservative</b> | None                                                                                                                                |
| <b>Storage</b>      | 2 - 8°C for up to 3 months / -20°C for long term storage                                                                            |

### BACKGROUND

|                     |                                                                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Introduction</b> | Ormetoprim is a close analog of diaveridine and a folic acid antagonist used in potentiated sulfonamide mixtures used as coccidiostats. |
