

# Trypanosoma Cruzi Chagas Protein (DAGF-202)

This product is for research use only and is not intended for diagnostic use.

## PRODUCT INFORMATION

<b>Antigen Description</b>	Trypanosoma cruzi is transmitted to humans by the Reduviid bug. Infection causes the host to contract Chagas' disease, or American trypanosomiasis, which is an important cause of cardiovascular and gastrointestinal disease in South America. These antigens are a cocktail of three geographically distinct strains.
<b>Conjugate</b>	Unconjugated
<b>Format</b>	Liquid
<b>Concentration</b>	Batch dependent - please inquire should you have specific requirements.
<b>Size</b>	1 mg
<b>Buffer</b>	50 mM glycine buffer, pH 9.0
<b>Preservative</b>	None
<b>Storage</b>	Store at 4°C for short term storage, aliquot and freeze at -20°C for long term storage

## BACKGROUND

<b>Keywords</b>	Trypanosoma cruzi Chagas; Trypanosoma cruzi Chagas protein; T. cruzi Chagas protein; T cruzi Chagas protein; Chagas protein,
