

Mouse Anti Cortisol Monoclonal Antibody

DMABT-49111MC Mouse(Cortisol)

Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview	Mouse Anti Cortisol
Immunogen	Synthetic corticosterone conjugated to Bovine Serum Albumin.
Host	Mouse
Isotype	IgG3
Species	Broad
Clone	CHO/D64
Conjugation	N/A
Applications	ELISA,
Dilution	ELISA: 1/500 - 1/5000

PACKAGING

Format	Purified IgG - liquid
Protein Concentration	1.0 mg/ml
Buffer	Phosphate buffered saline
Storage	Store at +4 °C or at -20 °C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted.
Preservative	0.09% Sodium Azide (NaN ₃)
Shelf Life	18 months from date of despatch.

BACKGROUND

Introduction Cortisol (hydrocortisone) is a steroid hormone, or glucocorticoid, produced by the adrenal gland. It is released in response to stress and a low level of blood glucocorticoids. Its primary functions are to increase blood sugar through gluconeogenesis; suppress the immune system; and aid in fat, protein and carbohydrate metabolism. It also decreases bone formation. During pregnancy, increased production of cortisol between weeks 30-32 initiates production of fetal lung surfactant to promote maturation of the lungs. Various synthetic forms of cortisol are used to treat a variety of diseases
