

Sheep Anti Bovine IgA Polyclonal Antibody, FITC

DPBT-67009SB Sheep(IgA) Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview Sheep Anti Bovine IgA,FITC

Immunogen Purified bovine IgA

Host Sheep

Isotype Polyclonal IgG

Species Bovine
Conjugation FITC

Applications IHC, FCM,

Dilution IHC: 1/20 - 1/100;FCM: 1/20 - 1/100

PACKAGING

Format Purified IgG fraction conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid

Protein ConcentrationlgG concentration 1.0 mg/mlBufferPhosphate buffered saline

Storage Storage Store at +4 °C or at -20 °C if preferred. This product should be stored undiluted. Storage in frost free

freezers is not recommended. This product is photosensitive and should be protected from light. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a

precipitate we recommend microcentrifugation before use.

Preservative 0.09%Sodium Azide0.2%Bovine Serum Albumin

Shelf Life 18 months from date of despatch.

BACKGROUND

Immunoglobulin A (IgA) is an antibody that plays a critical role in mucosal immunity. More IgA is

produced in mucosal linings than all other types of antibody combined; between three and five grams are secreted into the intestinal lumen each day. This accumulates to 75% of the total immunoglobulin produced in the entire body. IgA has two subclasses (IgA1 and IgA2) and can exist in a dimeric form called secretory IgA (sIgA). In its secretory form, IgA is the main immunoglobulin found in mucous

secretions, including tears, saliva, colostrum and secretions from the genitourinary tract, gastrointestinal tract, prostate and respiratory epithelium. It is also found in small amounts in blood. The secretory component of slgA protects the immunoglobulin from being degraded by proteolytic enzymes, thus slgA can survive in the harsh gastrointestinal tract environment and provide protection against microbes that multiply in body secretions. IgA is a poor activator of the complement system,

and opsonises only weakly. It's heavy chains are of the type α.
