

Absolute Mag™ Carboxyl Magnetic Particles, Fluorescent Pink, 1.0-1.4 µm

Cat.No: WHM-S147

DESCRIPTION

Description	Absolute Mag™ Carboxyl Magnetic Particles, Fluorescent Pink, 1.0-1.4 µm (# WHM-S147) are prepared by either staining the polystyrene core of the particles with a solution of appropriate fluorophore or by polymerizing a fluorophore in styrene in the presence of polystyrene core particles. They can be covalently coupled to proteins or ligands and used as fluorescent tracers for cell surface markers in fluorescence microscopy and flow cytometry.
--------------------	--

APPLICATION

Application Notes	<ul style="list-style-type: none">• Used for covalent coupling of proteins or ligands;• Used as fluorescent tracers for cell surface markers in fluorescence microscopy and flow cytometry.
--------------------------	--

PRODUCT INFORMATION

Particle Size	1.0-1.4 µm
Functional Group	Carboxyl
Concentration	1.0% w/v
Type Magnetization	Paramagnetic
Matrix	Polystyrene

STORAGE AND SHIPPING

Storage

Room temperature, do not freeze.
