| Tested Applications | ELISA,WB                                                                                                                                                                                                                                                         |
| Storage Buffer      | PBS with 0.1% Sodium Azide, 50% Glycerol, pH 7.3. -20°C, Avoid freeze / thaw cycles.                                                                                                                                                                             |
| Purification Method | Antigen Affinity Purified                                                                                                                                                                                                                                        |
| Isotype             | IgG                                                                                                                                                                                                                                                              |
| Alias               | excision repair cross-complementing rodent repair deficiency, complementation group 3 (xeroderma pigmentosum group B complementing);ERCC3;BTF2;GTF2H;RAD25;TFIIH;XPB ;                                                                                           |
| Product Type        | Purified Rabbit Anti human PolyClonal Antibody                                                                                                                                                                                                                   |
| Species             | Homo sapiens (Human)                                                                                                                                                                                                                                             |
| Target Names        | ERCC3                                                                                                                                                                                                                                                            |
| Target Details      | ERCC3 is an ATP-dependent DNA helicase that functions in nucleotide excision repair and complements xeroderma pigmentosum group B mutations. It also is the 89 kDa subunit of basal transcription factor 2 (TFIIH) and thus functions in class II transcription. |
