

# Phospho-EFNB1 (Y317) Antibody

|                            |                                                                                                                       |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>Product Code</b>        | CSB-PA007910                                                                                                          |
| <b>Storage</b>             | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.                                                         |
| <b>Uniprot No.</b>         | P98172                                                                                                                |
| <b>Immunogen</b>           | Synthesized peptide derived from Human Ephrin-B1 around the phosphorylation site of Y317.                             |
| <b>Raised In</b>           | Rabbit                                                                                                                |
| <b>Species Reactivity</b>  | Human,Mouse,Rat                                                                                                       |
| <b>Tested Applications</b> | WB,ELISA;WB:1/500-1/2000.ELISA:1/20000                                                                                |
| <b>Form</b>                | Liquid                                                                                                                |
| <b>Conjugate</b>           | Non-conjugated                                                                                                        |
| <b>Storage Buffer</b>      | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                               |
| <b>Purification Method</b> | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. |
| <b>Isotype</b>             | IgG                                                                                                                   |
| <b>Alias</b>               | EFNB1; EFL3; EPLG2; LERK2; Ephrin-B1; EFL-3; ELK ligand; ELK-L; EPH-related receptor tyrosine kinase ligand 2; LERK-2 |
| <b>Species</b>             | Homo sapiens (Human)                                                                                                  |
| <b>Target Names</b>        | EFNB1                                                                                                                 |
