

# Serpinh1 Antibody, FITC conjugated

|                     |                                                                                                                                  |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Product Code        | CSB-PA021087LC01MO                                                                                                               |
| Storage             | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.                                                                    |
| Uniprot No.         | P19324                                                                                                                           |
| Immunogen           | Recombinant Mouse Serpin H1 protein (18-417AA)                                                                                   |
| Raised In           | Rabbit                                                                                                                           |
| Species Reactivity  | Mouse                                                                                                                            |
| Tested Applications | ELISA                                                                                                                            |
| Relevance           | Binds specifically to collagen. Could be involved as a chaperone in the biosynthetic pathway of collagen.                        |
| Form                | Liquid                                                                                                                           |
| Conjugate           | FITC                                                                                                                             |
| Storage Buffer      | Preservative: 0.03% Proclin 300<br>Constituents: 50% Glycerol, 0.01M PBS, PH 7.4                                                 |
| Purification Method | >95%, Protein G purified                                                                                                         |
| Isotype             | IgG                                                                                                                              |
| Clonality           | Polyclonal                                                                                                                       |
| Alias               | Serpin H1 (47 kDa heat shock protein) (Collagen-binding protein) (Colligin) (Serine protease inhibitor J6), Serpinh1, Cbp1 Hsp47 |
| Species             | Mus musculus (Mouse)                                                                                                             |
| Research Area       | Signal Transduction                                                                                                              |
| Target Names        | Serpinh1                                                                                                                         |
