| <b>Species Reactivity</b>  | Human                                                                                                                                                                                                                                                                                                                                                        |
| <b>Tested Applications</b> | ELISA, IHC; Recommended dilution: IHC:1:20-1:200                                                                                                                                                                                                                                                                                                             |
| <b>Relevance</b>           | Receptor for the cytotoxic ligand TRAIL. Contains a truncated death domain and hence is not capable of inducing apoptosis but protects against TRAIL-mediated apoptosis. Reports are contradictory with regards to its ability to induce the NF-kappa-B pathway. According to Ref.1, it cannot but according to Ref.2, it can induce the NF-kappa-B pathway. |
| <b>Form</b>                | Liquid                                                                                                                                                                                                                                                                                                                                                       |
| <b>Conjugate</b>           | Non-conjugated                                                                                                                                                                                                                                                                                                                                               |
