| <b>Species Reactivity</b>  | Human                                                                                                                                                                                                                                                                         |
| <b>Tested Applications</b> | ELISA                                                                                                                                                                                                                                                                         |
| <b>Relevance</b>           | Molecular chaperone that functions in the processing and transport of secreted proteins. When associated with CNPY3, required for proper folding of Toll-like receptors By similarity. Functions in endoplasmic reticulum associated degradation (ERAD). Has ATPase activity. |
| <b>Form</b>                | Liquid                                                                                                                                                                                                                                                                        |
