

SERPINA1 Antibody, FITC conjugated

Product Code	CSB-PA12565C0Rb
Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Uniprot No.	P01009
Immunogen	Recombinant Human Alpha-1-antitrypsin protein (25-418AA)
Raised In	Rabbit
Species Reactivity	Human
Tested Applications	ELISA
Relevance	Inhibitor of serine proteases. Its primary target is elastase, but it also has a moderate affinity for plasmin and thrombin. Irreversibly inhibits trypsin, chymotrypsin and plasminogen activator. The aberrant form inhibits insulin-induced NO synthesis in platelets, decreases coagulation time and has proteolytic activity against insulin and plasmin. Short peptide from AAT: reversible chymotrypsin inhibitor. It also inhibits elastase, but not trypsin. Its major physiological function is the protection of the lower respiratory tract against proteolytic destruction by human leukocyte elastase (HLE).
Form	Liquid
Conjugate	FITC
Storage Buffer	Preservative: 0.03% Proclin 300 Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
Purification Method	>95%, Protein G purified
Isotype	IgG
Clonality	Polyclonal
Alias	Alpha-1-antitrypsin (Alpha-1 protease inhibitor) (Alpha-1-antiproteinase) (Serpina1) [Cleaved into: Short peptide from AAT (SPAAT)], SERPINA1, AAT PI
Species	Homo sapiens (Human)
Research Area	Cardiovascular
Target Names	SERPINA1
