

Phospho-PRKAA1/PRKAA2 (Ser487) Antibody

Product Code CSB-PA261465 Storage Upon receipt, store at -20°C or -80°C. Avoid repeated freeze. Uniprot No. Q13131 Immunogen Peptide sequence around phosphorylation site of serine 487 (S-G- SP-V-S) derived from Human AMPKa1. Raised In Rabbit Species Reactivity Human,Mouse,Rat Specificity The antibody detects endogenous level of AMPKa1 only when phosphorylated at serine 487. Tested Applications ELISA,WB,IHC,IF;WB:1:500-1:1000,IHC:1:50-1:100,IF:1:100-1:200 Relevance Responsible for the regulation of fatty acid synthesis by phosphorylation of acetyl-CoA carboxylase. It also regulates cholesterol synthesis via phosphorylation and inactivation of hormone-sensitive lipase and hydroxymethyfglutanyl-CoA reductase. Appears to act as a metabolic stress-sensing protein kinase switching off biosynthetic pathways when cellular ATP levels are depleted and when 5°-AMP rises in response to fuel limitation and/or hypoxia. This is a catalytic subunit. Kim JE, et al. (2005) J Proteome Res. 4(4): 1339-1346. Woods A, et al. (2003) J Biol Chem. 278(31): 28434-28442. Form Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl. 0.02% sodium azide and 50% glycerol. Purification Method Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho speci

Western blot analysis of extracts from HUVEC cells untreated or treated with UV using AMPKa1(Phospho-Ser487)Antibody.

Immunohistochemical analysis of paraffinembedded human colon carcinoma tissue using AMPKa1(Phospho-Ser487)Antibody(left) or the same antibody preincubated with blocking peptide(right).

Immunofluorescence staining of methanol-fixed Hela cells using AMPKa1(Phospho-Ser487) Antibody.

Western blot analysis of extracts from C6 cells, treated with EGF or calf intestinal phosphatase (CIP), using AMPKα1 (Phospho-Ser487) Antibody.
