

## Phospho-IGF1R (Tyr1280) Antibody

Storage
Uniprot No.         P08069           Immunogen         Peptide sequence around phosphorylation site of tyrosine 1280 (S-F-Y(p)-Y-S) derived from Human IGF-1R           Raised In         Rabbit           Species Reactivity         Human           Specificity         The antibody detects endogenous levels of IGF-1R only when phosphorylated at tyrosine 1280.           Tested Applications         ELISA,WB;WB:1:500-1:1000           Relevance         This receptor binds insulin-like growth factor 1 (IGF1) with a high affinity and IGF2 with a lower affinity. It has a tyrosine-protein kinase activity, which is necessary for the activation of the IGF1-stimulated downstream signaling cascade. When present in a hybrid receptor with INSR, binds IGF1. Ref.19 shows that hybrid receptors composed of IGF1R and INSR isoform Long are activated with a high affinity by IGF1, with low affinity by IGF2 and not significantly activated by insulin, and that hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Long and hybrid receptors composed of IGF1R and INSR isoform Short have similar binding characteristics, both bind IGF1 and have a low affinity for insulin.           Adams, T.E. et al. (2000) Cell. Mol. Life Sci. 57, 1050-1093 Baserga, R. et al. (2000) Oncogene 19, 5574-5581 Scheidegger, K.J. et al. (2000) J. Biol. Chem. 275, 38921-38928. O'Connor R
Peptide sequence around phosphorylation site of tyrosine 1280 (S-F-Y(p)-Y-S) derived from Human IGF-1R
derived from Human IGF-1R  Raised In Rabbit  Species Reactivity Human  Specificity The antibody detects endogenous levels of IGF-1R only when phosphorylated at tyrosine 1280.  Tested Applications ELISA,WB:WB:1:500-1:1000  Relevance This receptor binds insulin-like growth factor 1 (IGF1) with a high affinity and IGF2 with a lower affinity. It has a tyrosine-protein kinase activity, which is necessary for the activation of the IGF1-stimulated downstream signaling cascade. When present in a hybrid receptor with INSR, binds IGF1. Ref.19 shows that hybrid receptors composed of IGF1R and INSR isoform Long are activated with a high affinity by IGF1, with low affinity by IGF2 and not significantly activated by insulin, and that hybrid receptors composed of IGF1R and INSR isoform Short are activated by IGF1, IGF2 and insulin. In contrast, Ref.21 shows that hybrid receptors composed of IGF1R and INSR isoform Short have similar binding characteristics, both bind IGF1 and have a low affinity for insulin.  Adams, T.E. et al. (2000) Cell. Mol. Life Sci. 57, 1050-1093 Baserga, R. et al. (2000) Oncogene 19, 5574-5581 Scheidegger, K.J. et al. (2000) J. Biol. Chem. 275, 38921-38928.  O'Connor R, et al. Mol Cell Biol 1997 Jan; 17(1): 427-35  Form Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.  Purification Method Antibodies were produced by immunizing rabbits with synthetic peptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific peptide.  Clonality Polyclonal
Specificity The antibody detects endogenous levels of IGF-1R only when phosphorylated at tyrosine 1280.  Tested Applications ELISA,WB;WB:1:500-1:1000  This receptor binds insulin-like growth factor 1 (IGF1) with a high affinity and IGF2 with a lower affinity. It has a tyrosine-protein kinase activity, which is necessary for the activation of the IGF1-stimulated downstream signaling cascade. When present in a hybrid receptor with INSR, binds IGF1. conjugates. Antibodies were purified by affinity-chromatography using epitope-specific peptide.  Clonality  Polyclonal
Alice ICED: CD221: ICED
Alias IGFR; CD221; IGFIR
Product Type Polyclonal Antibody
Species Homo sapiens (Human)
Target Names IGF1R
