| Tested Applications | ELISA, WB, IHC; Recommended dilution: WB:1:1000-1:5000, IHC:1:20-1:200                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Relevance           | Nuclear receptor that exhibits a ligand-dependent transcriptional activation activity (PubMed:19481530, PubMed:25661920). Interaction with retinoic acid receptor (RXR) shifts RXR from its role as a silent DNA-binding partner to an active ligand-binding subunit in mediating retinoid responses through target genes defined by LXRES (By similarity). LXRES are DR4-type response elements characterized by direct repeats of two similar hexanuclotide half-sites spaced by four nucleotides (By similarity). Plays an important role in the regulation of cholesterol homeostasis, regulating cholesterol uptake through MYLIP-dependent ubiquitination of LDLR, VLDLR and LRP8 (PubMed:19481530). Interplays functionally with RORA for the regulation of genes involved in liver metabolism (By similarity). |

| Image               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**Western blot**

All lanes: NR1H3 antibody at 6 $\mu$ g/ml + Mouse liver tissue

**Secondary**

Goat polyclonal to rabbit IgG at 1/10000 dilution

Predicted band size: 51, 44, 46 kDa

Observed band size: 51 kDa

Immunohistochemistry of paraffin-embedded human placenta tissue using CSB-PA619753LA01HU at dilution of 1:100

Immunohistochemistry of paraffin-embedded human thyroid tissue using CSB-PA619753LA01HU at dilution of 1:100
