| <b>Abbreviation</b>        | DAN domain family member 5 protein                                                                                                                                                                                                                             |
| <b>Storage</b>             | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.                                                                                                                                                                                                  |
| <b>Uniprot No.</b>         | Q8N907                                                                                                                                                                                                                                                         |
| <b>Immunogen</b>           | Recombinant Human DAN domain family member 5 protein (23-189AA)                                                                                                                                                                                                |
| <b>Raised In</b>           | Rabbit                                                                                                                                                                                                                                                         |
| <b>Species Reactivity</b>  | Human                                                                                                                                                                                                                                                          |
| <b>Tested Applications</b> | ELISA                                                                                                                                                                                                                                                          |
| <b>Relevance</b>           | Seems to play a role in the correct specification of the left-right axis. May antagonize NODAL and BMP4 signaling. Cystine knot-containing proteins play important roles during development, organogenesis, tissue growth and differentiation (By similarity). |
| <b>Form</b>                | Liquid                                                                                                                                                                                                                                                         |
