

# KCNK13 Antibody, Biotin conjugated

|                     |                                                                                                                       |
|---------------------|-----------------------------------------------------------------------------------------------------------------------|
| Product Code        | CSB-PA862058LD01HU                                                                                                    |
| Storage             | Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.                                                         |
| Uniprot No.         | Q9HB14                                                                                                                |
| Immunogen           | Recombinant Human Potassium channel subfamily K member 13 protein (292-408AA)                                         |
| Raised In           | Rabbit                                                                                                                |
| Species Reactivity  | Human                                                                                                                 |
| Tested Applications | ELISA                                                                                                                 |
| Relevance           | Potassium channel displaying weak inward rectification in symmetrical K(+) solution.                                  |
| Form                | Liquid                                                                                                                |
| Conjugate           | Biotin                                                                                                                |
| Storage Buffer      | Preservative: 0.03% Proclin 300<br>Constituents: 50% Glycerol, 0.01M PBS, PH 7.4                                      |
| Purification Method | >95%, Protein G purified                                                                                              |
| Isotype             | IgG                                                                                                                   |
| Clonality           | Polyclonal                                                                                                            |
| Alias               | Potassium channel subfamily K member 13 (Tandem pore domain halothane-inhibited potassium channel 1) (THIK-1), KCNK13 |
| Species             | Homo sapiens (Human)                                                                                                  |
| Research Area       | Neuroscience                                                                                                          |
| Target Names        | KCNK13                                                                                                                |
