

MCM5 Antibody

Product Code CSB-PA920054 Storage Upon receipt, store at -20°C or -80°C. Avoid repeated freeze. Uniprot No. P33992 Immunogen Synthesized peptide derived from Human MCM5 antibody. Raised In Rabbit Species Reactivity Human,Mouse,Rat Specificity The antibody detects endogenous levels of total MCM5 protein. Tested Applications ELISA,WB,IHC,IF;WB:1:500-1:3000,IHC:1:50-1:100,IF:1:100-1:500 Relevance Acts as component of the MCM2-7 complex (MCM complex) which is the putative replicative helicase essential for 'once per cell cycle' DNA replication initiation and elongation in eukaryotic cells. The active ATPases sites in the MCM2-7 ring are formed through the interaction surfaces of two neighboring subunits such that a critical structure of a conserved arginine finger motif in trans relative to the ATP-briding site of the Walker A box of the adjacent subunit. The six ATPase active sites, however, are likely to contribute differentially to the complex helicase activity By similarity. Interacts with MCMBP. Robert A. Sclafani, Genetics, May 2002; 161: 47.		
Uniprot No. P33992 Immunogen Synthesized peptide derived from Human MCM5 antibody. Immunohistochemical analysis of paraffinembedded human tonsil tissue using MCM5 antibody.

Immunofluorescence analysis of HepG2 cells, using MCM5 antibody.

Western blot analysis of extracts from HepG2 cells, using MCM5 antibody.

Western blot analysis of extracts from HeLa cells (Lane 2), A549 cells (Lane 3) and cells (Lane 4), using MCM5 antiobdy. The lane on the left is treated with systhesized peptide.
