Description	This Mouse SERPINA6 ELISA Kit was designed for the quantitative measurement of Mouse SERPINA6 protein in serum, plasma. It is a Competitive ELISA kit, its detection range is 0.2 µg/mL-80 µg/mL and the sensitivity is 0.2 µg/mL.
Target Details	This gene encodes an alpha-globulin protein with corticosteroid-binding properties. This is the major transport protein for glucocorticoids and progestins in the blood of most vertebrates. The gene localizes to a chromosomal region

containing several closely related serine protease inhibitors which may have evolved by duplication events.

Product Precision

Intra-assay Precision (Precision within an assay): CV%<15%

Three samples of known concentration were tested twenty times on one plate to assess.

Inter-assay Precision (Precision between assays): CV%<15%

Three samples of known concentration were tested in twenty assays to assess.

Linearity

To assess the linearity of the assay, samples were spiked with high concentrations of mouse SERPINA6 in various matrices and diluted with the Sample Diluent to produce samples with values within the dynamic range of the assay.

Recovery

The recovery of mouse SERPINA6 spiked to levels throughout the range of the assay in various matrices was evaluated. Samples were diluted prior to assay as directed in the Sample Preparation section.
