

GFP Monoclonal Antibody

Product Code	CSB-MA000051M0m
Storage	Upon receipt, store at -20°C or -80°C. Avoid repeated freeze.
Immunogen	Recombinant GFP Protein
Raised In	mouse
Species Reactivity	N/A
Tested Applications	ELISA, WB, IP; Recommended dilution: WB: 1:500-1:5000, IP: 1:200-1:2000
Relevance	The green fluorescent protein (GFP) is a protein that exhibit bright green fluorescence when exposed to blue light. The protein is in the shape of a cylinder, comprising 11 strands of beta-sheet with an alpha-helix inside and short helical segments on the ends of the cylinder. Inward-facing sidechains of the barrel induce specific cyclization reactions in the tripeptide Ser65-Tyr66-Gly67 that lead to chromophore formation. Its amazing ability to generate a highly visible, efficiently emitting internal fluorophore is both intrinsically fascinating and tremendously valuable. The green-fluorescent protein (GFP) of the jellyfish <i>Aequorea victoria</i> has always been used as a universal reporter in a broad range of heterologous living cells and organisms. GFP has become well established as a marker of gene expression and protein targeting in intact cells and organisms.
Form	liquid
Conjugate	Non-conjugated
Storage Buffer	Preservative: 0.03% Proclin 300 Constituents: 50% Glycerol, 0.01M PBS, PH 7.4
Purification Method	>95%, Protein G purified
Isotype	IgG2b
Clonality	monoclonal
Product Type	Tag Control Antibody
Clone No.	10B4E3

Image

WB: Mouse Anti-GFP monoclonal antibody at 0.1µg/ml
 Line 1: HEK-293 cell lysate
 Line 2: GFP transfected HEK-293 cell lysate
 Secondary
 Goat polyclonal to Mouse IgG at 1/5000 dilution
 Predicted band size : 30kd
 Observed band size : 30kd

IP:Result of anti-GFP-tag Monoclonal antibody

Line 1:Control IgG

Line 2:Precipitateing GFP-tagged fusion protein

Line 3:GFP Transfected HEK-293 cells lysate

Secondary

Goat polyclonal to Mouse IgG at 1/5000 dilution

Predicted band size : 30kd

Observed band size : 30kd
