

Histone H3(Acetyl Lys36) Rabbit Polyclonal Antibody

Catalog Number: E12-263

Amount: 100μg/100μl

Alternative Names: Hbp23, Heme binding 23kDa protein, Macrophage stress protein 22kDa, MSP23, NKEF A,

Prdx1

Background: Peroxiredoxin-1 is a protein which reduce hydrogen peroxide and alkyl hydroperoxides. The

encoded protein may play an antioxidant protective role in cells, and may contribute to the antiviral activity of CD8(+) T-cells. This protein may have a proliferative effect and play a role in cancer development or progression. Three transcript variants encoding the same protein have

been identified for this gene.

Form of Antibody: Purified Rabbit IgG, 1mg/ml in PBS pH7.4, containing 0.02% sodium azide as Preservative

and 50% Glycerol.

Storage/Stability: Store at -20°C/1 year. Do not aliquot the antibody.

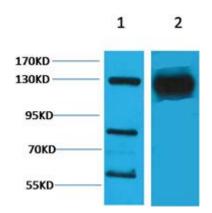

Specificity/Sensitivity: The Histone H4(Phospho Thr32) Rabbit Polyclonal Antibody can detects endogenous Histone

H3 (Phospho Thr32) protein.

Reactivity: R, M

Applications: WB: 1:1,000-2,000

Molecular Weight: 120KD

Western blot analysis of 1)Mouse Liver, 2) Rat Liver tissue with HIF-1α Rabbit pAbE12-263 diluted at 1:2,000.
