

TFIIB Antibody

E230005

Catalog Number	E230005-1, E230005-2
Amount	50µg/50µl, 100µg/100µl
Description	Rabbit polyclonal IgG to TFIIB
GeneBank ID	NM_001514.5
Immunogen	Recombinant full length amino acids of human TFIIB.
Reacts with	Hu, Ms
Tested applications	Recommended dilutions. ELISA: 1/5000 - 1/20000. WB: 1/800 - 1/2000.
Cellular localization	Nucleus
Relevance	TFIIB is one of the ubiquitous factors required for transcription initiation by RNA polymerase II. The protein localizes to the nucleus where it forms a complex (the DAB complex) with transcription factors IID and IIA. Transcription factor IIB serves as a bridge between IID, the factor which initially recognizes the promoter sequence, and RNA polymerase II.
Purity	Protein G-Sepharose affinity purified.
Storage buffer	Preservative: 0.02% Sodium Azide and 50% glycerol, 1% BSA, PBS, pH7.4.
Form	Liquid
Storage instructions	Aliquot and store at -20°C. Avoid repeated freeze / thaw cycles.

TFIIB antibody (E230005) at 1/800 dilution interacts with MCF7 whole cell lysate 40ug. Predicted band size: 35KDa. Observed band size: 34KDa.
