

CARD8 Polyclonal Antibody

E90293**Catalog Number:** E90293**Amount:** 100ul

Background: The protein encoded by this gene belongs to the caspase recruitment domain (CARD)-containing family of proteins. These proteins are involved in pathways leading to activation of caspases or nuclear factor kappa-B (NFkB). This protein is a component of the inflammasome, a protein complex that plays a role in the activation of proinflammatory caspases. It is thought that this protein acts as an adaptor molecule that negatively regulates NFkB activation, CASP1-dependent secretion, and apoptosis. Polymorphisms in this gene may be associated with a susceptibility to rheumatoid arthritis. Alternatively spliced transcript variants have been described for this gene, but their biological validity has not been determined. [provided by RefSeq]

Species: Rabbit**Isotype:** IgG

Storage/Stability: Store at -20oC or -80oC. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonyms: CARD8;CARDINAL;DACAR;DKFZp779L0366;Dakar;FLJ18119;FLJ18121;KIAA0955;MGC57162;NDPP;NDPP1

Immunogen: Recombinant protein of human CARD8

Purification: Affinity purification

Reactivity: H

Applications: WB IHC

Molecular Weight: 49kDa

Weight:

Swiss-Prot No. : Q9Y2G2

Gene ID: 22900

For Research Use Only
